

The Joyful Hearts community program is a series of Social Emotional Learning (SEL) lessons for children, organized by CDC in Sunway GEO. This one hour fun filled program is designed to enrich your child with living skills and values through storytelling, role plays, games, and art & craft. These values which we have learnt during our own childhood are no longer considered important. Values like: how not to be messy, whining and complaining, about teasing others, etc.

These simple living skills are no longer emphasized sufficiently. Academic achievements, computer games and social media activities are given priorities. Our teachers will be using the Joy Berry books for kids as a guide and hope to enrich children to become responsible individuals.

Have a look at what we have in store for the year.
